SRC | Net

SKAO Regional Centre Network

New standard, new document structure.

The Execution Broker service is based on the following IVOA standards :

- *The IVOA REST service framework*
- *The IVOA structured error messages*
- *The IVOA HTTP protocol profile*
- *The IVOA JSON encoding profile*
- *The IVOA YAML encoding profile*

Unless otherwise stated, the Execution Broker service follows the profiles defined in these standards.

SKAO Regional Centre Network

New standard, new document structure.

“This document explains the reasoning behind the design and uses examples to describe the service behavior.”

“The technical details of the data model and web-service API are defined in the OpenAPI specification published alongside this document.”

The problem

Lots of different execution platforms

Each with their own local capabilities and policies

SRCNet demo,
21st November 2024

Dave Morris
dave.morris@manchester.ac.uk

Execution Broker – the service

Deploys a common interface for executing things

SRC | Net

SKAO Regional Centre Network

The problem

Lots of different types of software

Each with their own requirements and interfaces

SRC | Net

SKAO Regional Centre Network

Execution Broker – the data model

Use a common data model to describe executable things

Execution Broker – the solution

Pass a common data-model description to a common interface

When can I run this ?

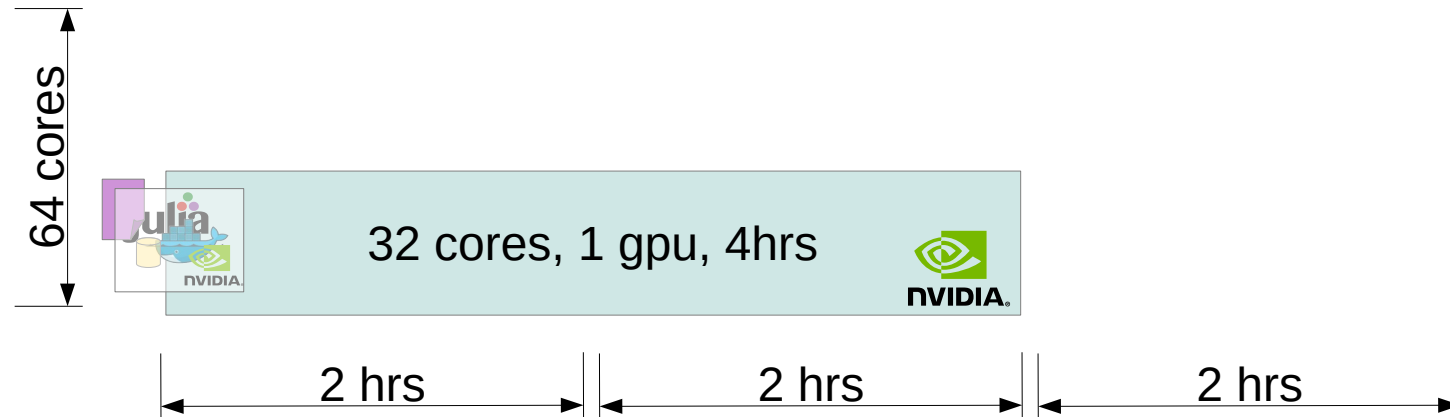

Resource scheduling

When can I run <this> ?

Request for 32 cores and a GPU for 4 hrs

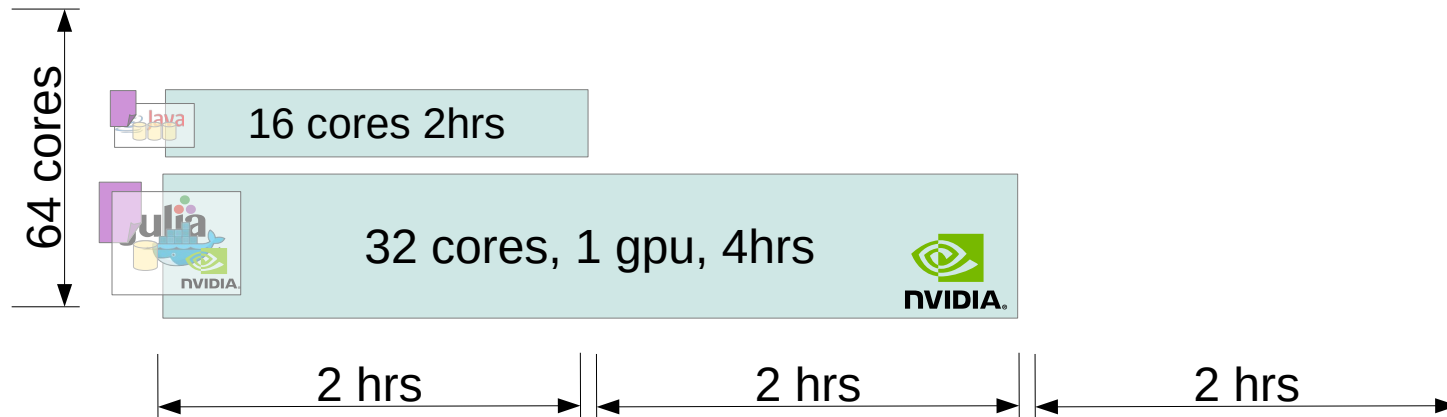

Resource scheduling

When can I run <this> ?

Request for 16 cores 2 hrs

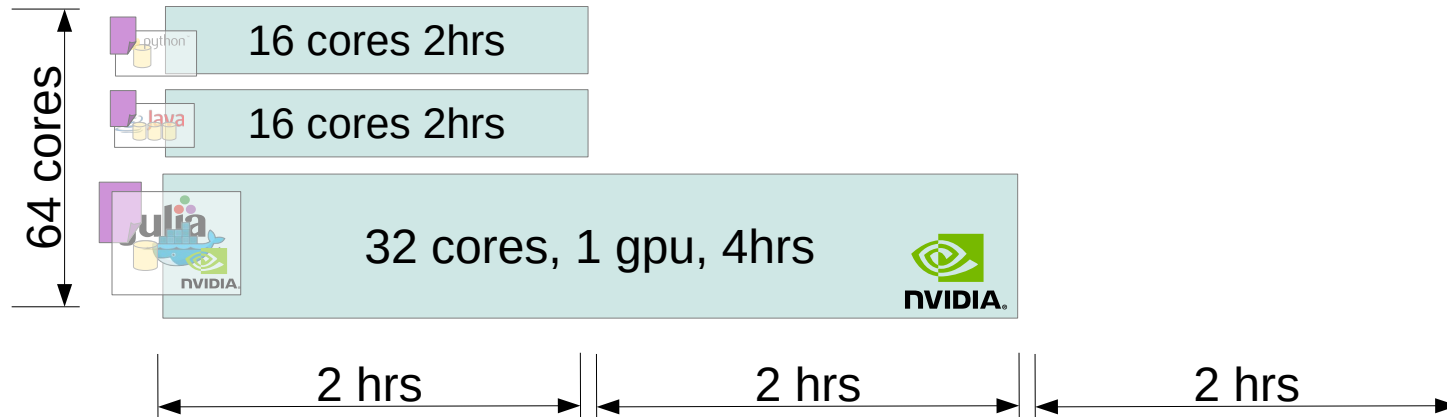

Resource scheduling

When can I run <this> ?

Request for 16 cores 2 hrs

SRC | Net

SKAO Regional Centre Network

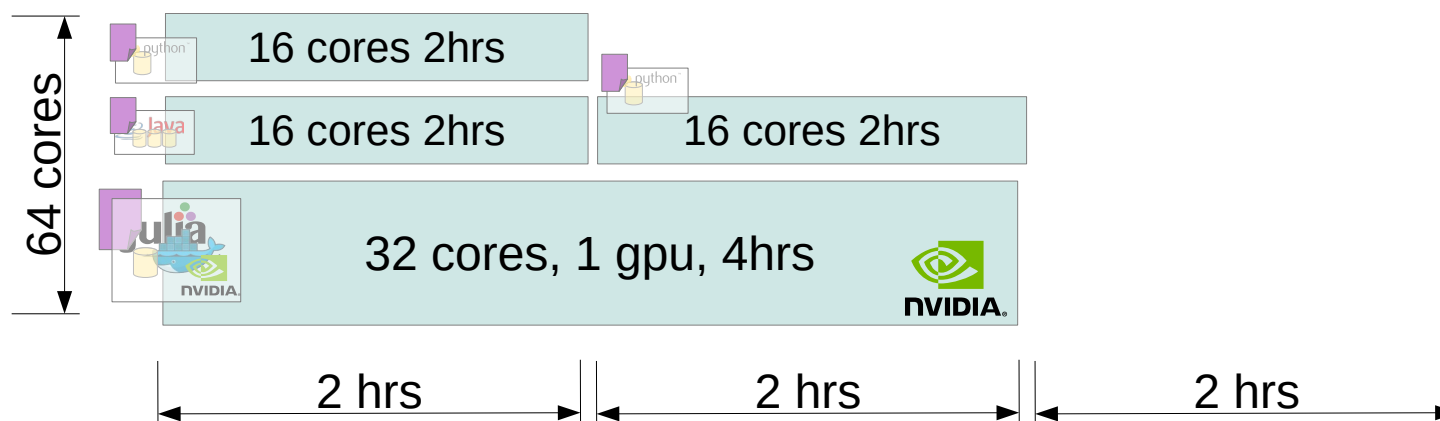

Resource scheduling

When can I run <this> ?

Request for 16 cores 2 hrs

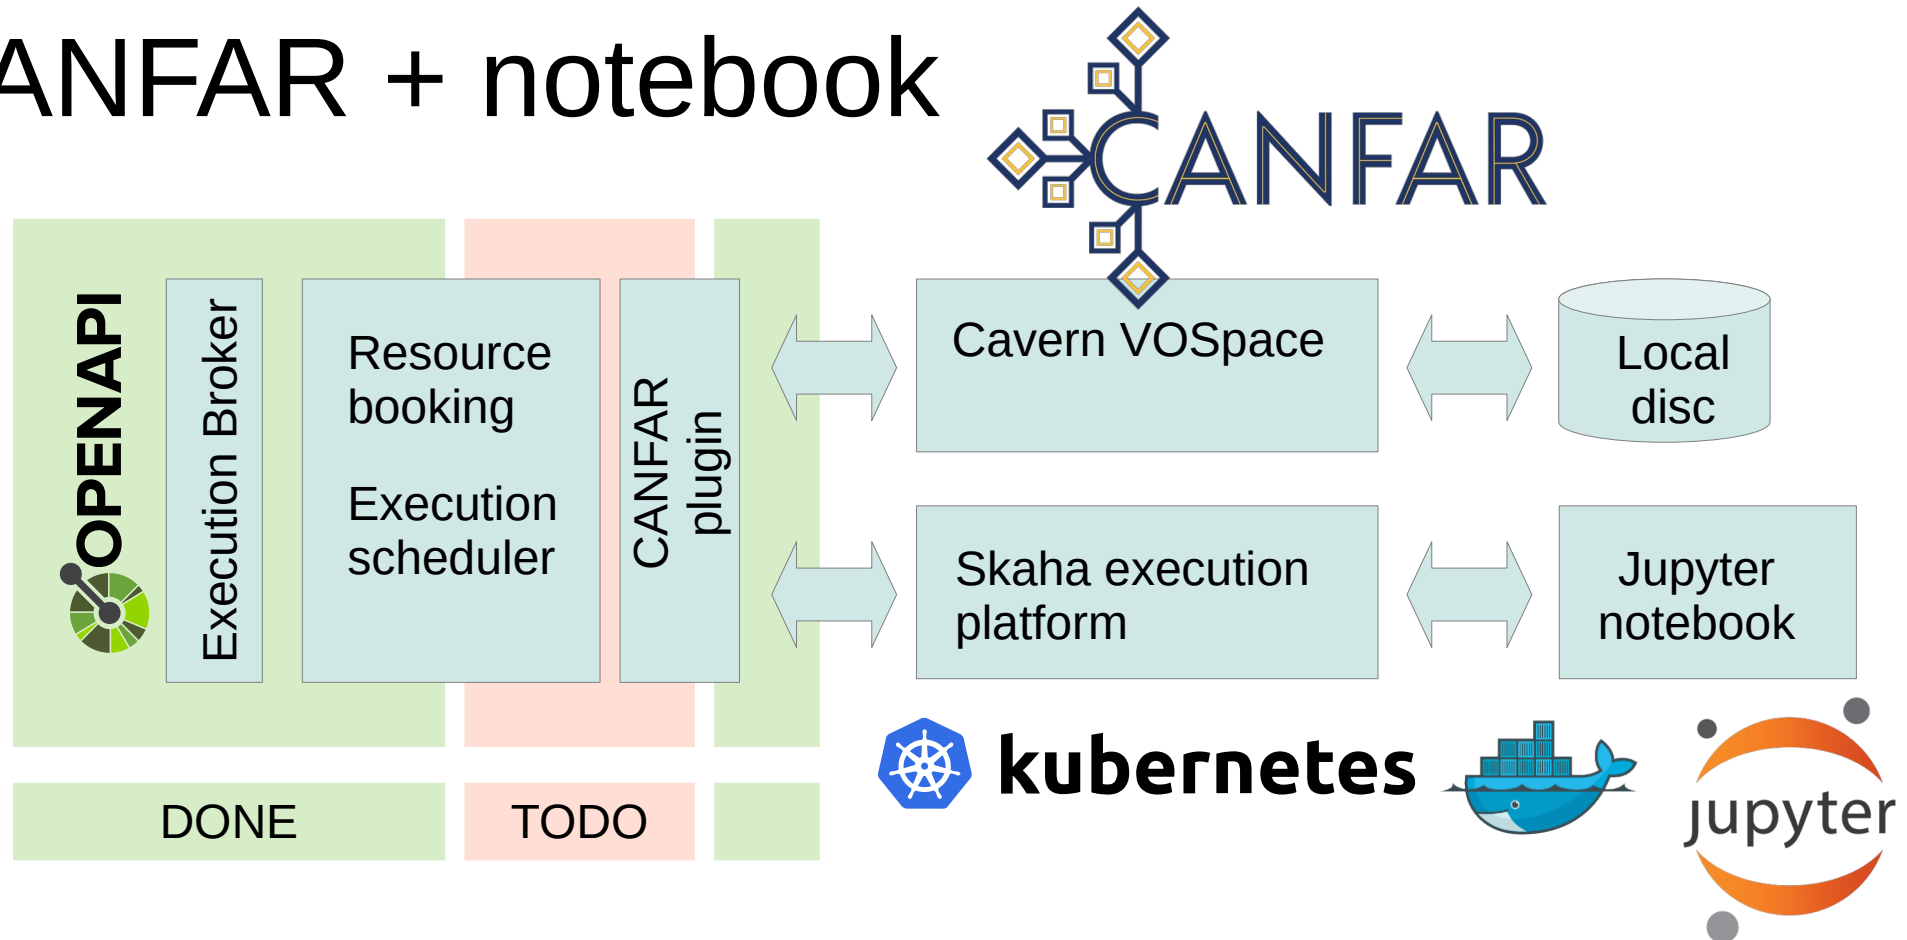

SRC | Net

SKAO Regional Centre Network

Prototype #1 PI23/24

CANFAR + notebook

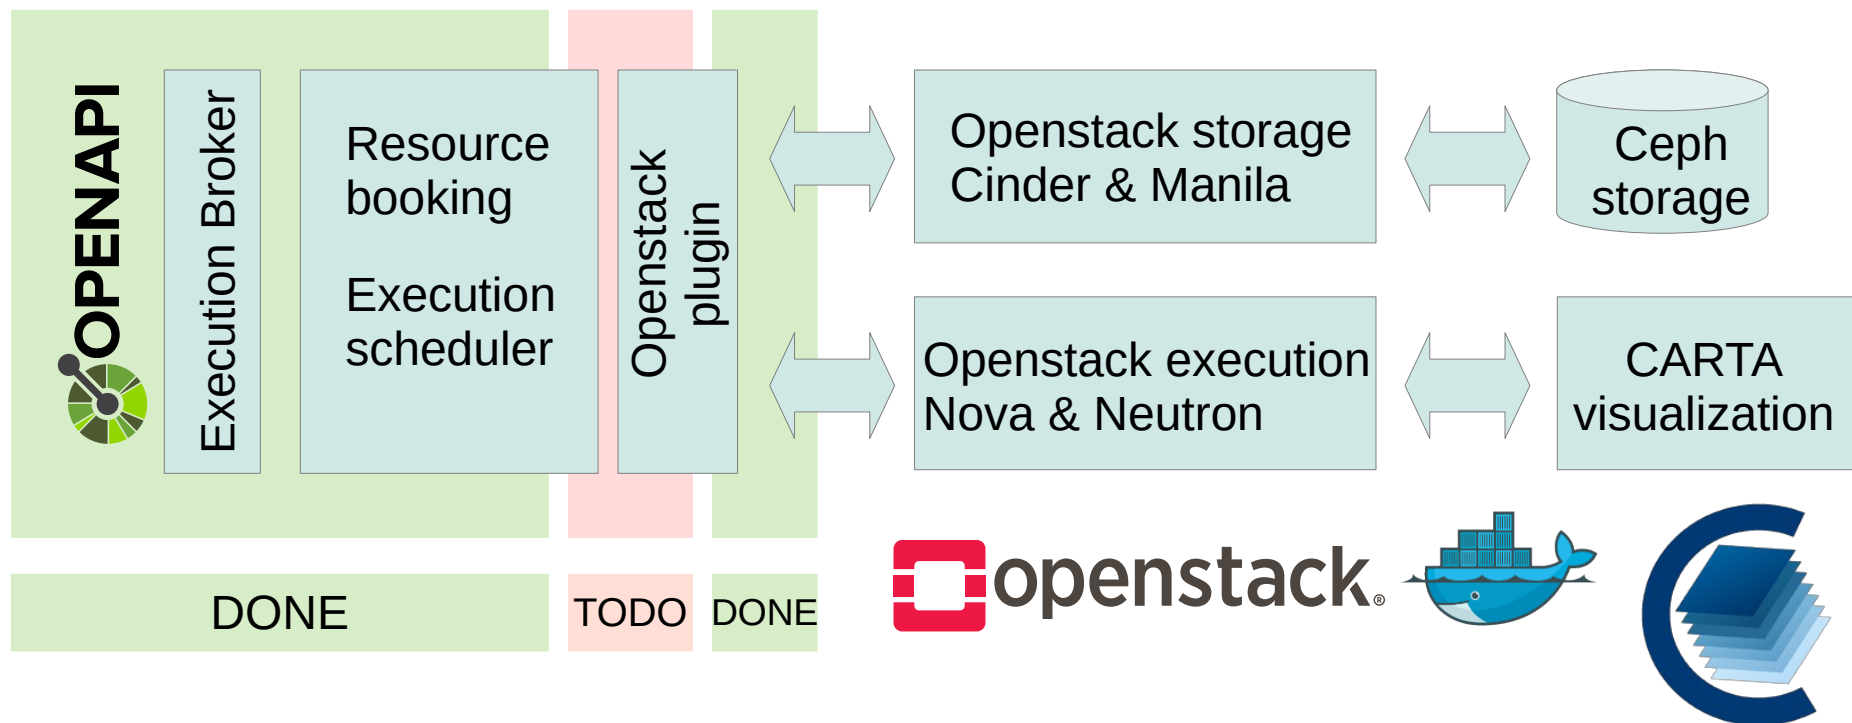

SRC | Net

SKAO Regional Centre Network

Prototype #2 PI26

Openstack + visualization

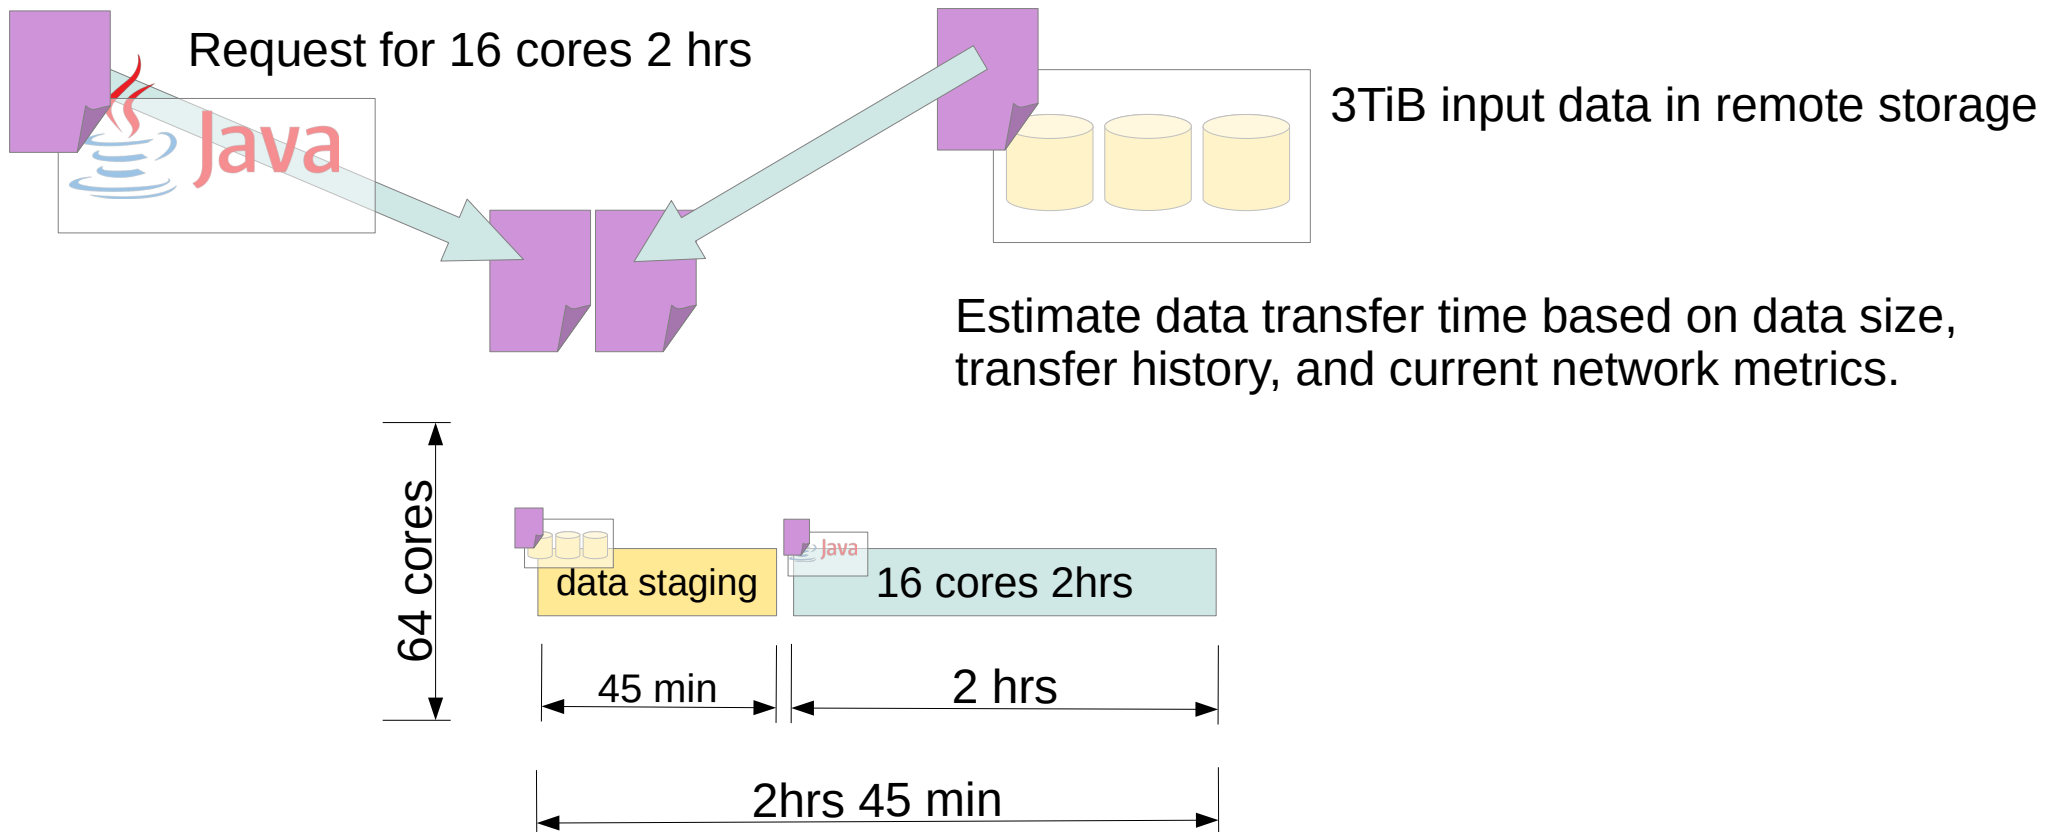

SRC | Net

SKAO Regional Centre Network

Data staging (future work)

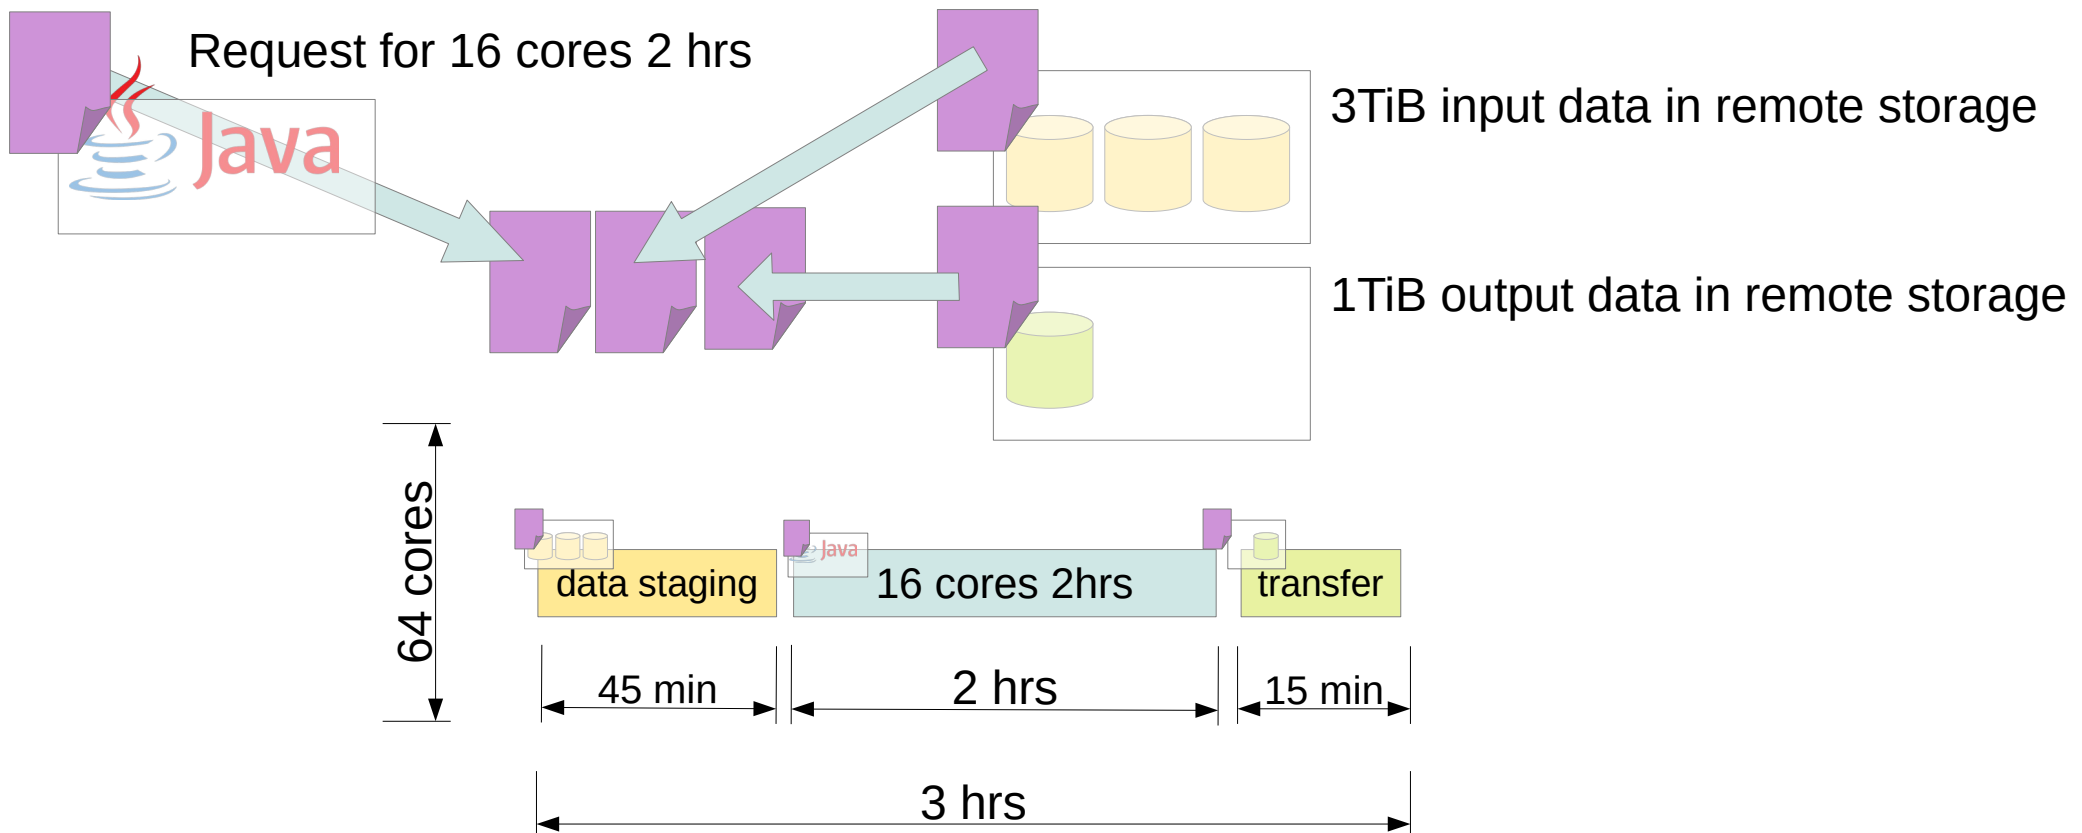

When can I run <this> with <this> input data ?

Data staging (future work)

When can I run <this> with <this> data, and put the results <there> ?

Prototype #3

Use cases

<science use case here>

GPU **Rucio data** **Workflow**
FPGA **SrcNet data** **S3 data**
Slurm **processing pipeline**
Kubernetes **HTCondor**
Openstack
